Objective

Experienced Software Developer with over 4 years in the industry, highly skilled in problem-solving, analytics, and strategic decision-making. Adept at thriving in fast-paced environments and delivering high-quality, impactful applications with efficiency and precision.

Skills

Languages : JavaScript, TypeScript, SQL , C, C++,
Frontend : HTML, CSS, Bootstrap, Tailwind CSS, AngularJS, Angular, React (basic)
Backend : Node.js, Express.js, Socket.io, RESTful APIs, JWT
Databases : MySQL, MongoDB
Tools : Git, GitHub, SVN, Jira, Postman, VS Code, NPM, Swagger, Figma, MS Office

Work Experience

Software Developer

Chetu India Pvt. Ltd., Noida

July 2023 - Present

- Developed scalable full-stack web applications using JavaScript, TypeScript, Node.js, and Angular, delivering responsive and high-performing user interfaces and APIs.
- Built RESTful APIs using Express.js and connected them with MongoDB and MySQL, ensuring efficient data handling, security, and consistency across systems.
- Designed reusable components and services in Angular to streamline UI development and maintain consistency across the application.
- Optimized backend performance by implementing efficient queries, indexing, caching strategies, and middleware in Node.js.
- Integrated authentication and authorization using JWT for secure access control across the application.
- Used Git and GitHub, SVN, for version control, branching, code reviews, and collaborative development with the team following Agile methodologies.
- Deployed applications on production environments using PM2, Nginx, and cloud-based servers, ensuring high availability and scalability.
- Participated in code reviews, testing, and debugging, contributing to overall code quality and maintainability.
- Collaborated with cross-functional teams to understand client requirements and translate them into technical solutions.

Software Developer

Gventure Technology Pvt. Ltd., Noida

January 2022 - June 2023

- Assisted in developing web applications using Angular for the frontend and Node.js with Express.js for the backend, contributing to responsive and scalable web solutions for business needs.
- Wrote RESTful APIs in Express.js to handle CRUD operations and connected them with MySQL, enabling smooth and secure data flow.
- Created reusable Angular components and services to build maintainable, interactive user interfaces that enhanced user experience.
- Helped in writing and optimizing SQL queries for data operations such as insertion, retrieval, filtering, and updates, ensuring performance and data integrity.
- Worked on integrating frontend and backend for real-time communication using Angular services and backend APIs, ensuring consistent data updates.
- Gained hands-on experience in Angular features like form validation, reactive and template-driven forms, routing, and two-way data binding.
- Used Git, GitHub, and SVN for version control, managing code branches and contributing to collaborative development tasks in an Agile methodologies.

Web Developer

HangingPanda Pvt. Ltd., Noida

September 2021 - January 2022

- Backend development using Node.js and Express.js to build RESTful APIs for managing data operations and connecting client requests to the database.
- Developed and tested API endpoints for features such as user authentication, data submission, and reports, ensuring functionality and proper request handling using Postman.
- Worked with both MySQL and MongoDB for data storage, writing optimized queries and designing schemas to ensure performance and consistency.
- Implemented middleware in Express for input validation, request logging, and error handling, and added JWT authentication to secure API access.

- Collaborated with frontend developers to integrate backend services, maintained consistent API responses, and organized code using the MVC pattern for better structure.
- Used Git and GitHub for version control, contributing to collaborative development and managing code through branching and pull requests.

Personal Projects

Real-Time Chat Application (Angular, Node.js, Express.js, MongoDB, Socket.io, JWT)

- Developed a full-stack chat application enabling real-time communication between users using Socket.io for WebSocket-based messaging.
- Implemented user authentication using JWT and created RESTful APIs for login, registration, and chat history management.
- Designed a responsive frontend using Angular with features like chat rooms, user presence indicators, and message notifications. Integrated MongoDB to store user credentials and chat logs, ensuring persistent and structured data storage.
- Focused on clean UI/UX and used Git for version control throughout the development process.

E-Commerce (Angular, Node.js, Express.js, JWT, MySQL)

- Built a full-stack e-commerce platform that allows users to browse products, manage shopping carts, and place orders.
- Implemented a dynamic frontend using Angular and built RESTful APIs with Node.js and Express.js for product management, user authentication, and order processing.
- Integrated MySQL as the database to handle user data, product listings, orders, and transactions efficiently. Included features like category filters, product search, cart updates, and secure checkout.
- Focused on responsive design, reusable components, and seamless frontend-backend integration. Used Git and Postman for API testing and version control during development.

Student Management System (Angular, Node.js, Express.js, JWT, MySQL)

- Developed a web-based application to manage student records, including personal details, academic performance, and class assignments.
- Built the frontend using Angular and the backend using Node.js and Express.js to create RESTful APIs for CRUD operations.
- Used MySQL to design relational tables for storing student data, course details, and attendance records. Implemented user authentication and role-based access to differentiate between admin and teacher functionalities.
- Integrated form validations, filtering, and search features for efficient data management. Ensured a responsive and user-friendly interface with a focus on scalability and maintainability. Version control handled using Git and GitHub.

Education

Bachelor Of Computer Applications

June 2016 - July 2019

University Of Rajasthan

Certification

- Modern HTML & CSS From Udemy
- Complete JavaScript Course From Udemy
- Instagram Marketing From Udemy
